

MORPHO Workstation Pack

*Yasmin Morpho
Workstation Pack with
Fingerprint Verification
And Paperscan
Acquisition Solution*

- High Quality Fingerprint Acquisitions.
- Worldwide Recognized SAGEM DS Algorithm.
- 1:1 Authentication
- MyKad Integration
- FBI IQS Certified Paper Scanning Solution.
- Client Server support via secured web service query interface.

YASMIN Morpho Workstation Pack

Yasmin Morpho Workstation Pack with Fingerprint Verification and Paperscan Acquisition Solution

Biometric authentication using sophisticated digital finger imaging technology has revolutionized the market for logical and physical authentication system. At the forefront of such technology is the Morpho Workstation Pack system. Developed and maintained by Yasmin Teknologi to meet the most demanding authentication requirements. Operating in any PC based environment, the Morpho Workstation Pack is an ideal security solution.

System Integrators and value Added solution provider can now benefit directly from Yasmin Teknologi vast expertise in extremely accurate and reliable finger imaging technology. The Morpho Workstation Pack provides a positive response to controlling access to products, places and services.

The Yasmin Morpho Workstation Pack is a development package adaptable to an ever-expanding range of customer applications such as; financial services, banking, fund managements, access control, network security, time & attendance, and law enforcement.

The Morpho Workstation Pack contains tools necessary to perform acquisition and authentication, based on a proven finger imaging technology.

Key Features

- Live Acquisition with reliable SAGEM MorphoSmart™ Optical biometric device.
- Paper form acquisition with FBI IQS certified scanners.
- Biometric features
 - Live controls related to the image quality and the finger positioning during acquisition.
 - Ability to tune the quality threshold according to the application security requirements.
 - Image quality optimization, during acquisition and preprocessing.
 - Efficient Minutiae template extraction.
- Malaysian MyKad Integration capabilities.
- Microsoft .Net Framework solution development environment. And Support for web integration.
- Provide optional interface for web service server integration. In a client-server environment.

Technical Specifications

- System requirements
 - Pentium II 500MHz,
 - 128MB of RAM
 - Ethernet network
 - 2x USB port connection.
 - Microsoft Windows 2000 SP2 or XP O/S.
- Terminal compliance
 - MorphoSmart™
 - FBI IQS Certified Scanners.

Optional Packages

- Automatic Fingerprint Identification System (AFIS) Query Server in a client-server environment.
