

## MorphoMyKad

*MorphoMyKad  
Biometric  
Solution*

- Based on Sagem's world class Morpho technology
- Can be used for 1 : 1 or 1 : N systems
- Supports On-board fingerprint storage
- Combines MyKad data-reading functions with state of the art biometrics technology
- Scalable to suit wide range of applications

# MorphoMyKad

## MorphoMyKad Biometric Solution

Yasmin Teknologi's MorphoMyKad Solution was developed to provide a simple yet comprehensive biometric system.

It contains the core components to create a complete biometric solution. This is further enhanced with MyKad reading functions being made available. MorphoMyKad serves as a library of fingerprint functions that you can use to build your own biometric solution.

MorphoMyKad is based on Sagem's MorphoSmart technology featuring advanced features such as 1 to 1 Verification as well as 1 : Many Identification functions.

### Technical Specifications

**System Requirements:**  
Pentium II 500MHz, 128MB RAM  
Windows 2000, XP  
USB Connection

### Key Features

- Compatible with a wide range of Sagem's Morpho fingerprint scanners
- Features 1: 1 as well as 1:N matching
- Uses Sagem's Morpho algorithm
- Allows the extraction of a wide range of MyKad data
- Provides acquisition functions that are compatible with MyKad fingerprint data
- Fingerprint can be stored in the fingerprint device itself
- Highly customisable
