YPAK

Yasmin Portrait Acquisition Kit

Yasmin Portrait Acquisition Kit was developed to generate high quality MyKad-standard compliant portraits using Canon™ Digital Still Cameras.

With a huge list of compatible Canon Digital Cameras, ranging from the entry level Powershot A Series up to the powerhouse G7, YPAK offers unmatched flexibility. Such compatibility does not forego quantity for quality though, as YPAK allows for the customization of most of the cameras' major settings. Thus, you gain solid control of the camera so that you can get the best picture quality possible.

YPAK also incorporates highly advanced image processing features that do all the hard work for you so that you don't have to.

Technical Specifications
